

## Insight Expands OneCall Support and Managed Services for Nutanix

October 18, 2018

*Monitoring and troubleshooting available for Nutanix' Enterprise Cloud Software OS on multiple hardware platforms*

TEMPE, Ariz., Oct. 18, 2018 (GLOBE NEWSWIRE) -- Insight's Cloud & Data Center Transformation (CDCT) division, Datalink, today announced the expansion of Insight [OneCall™ support](#) and managed services offerings to include support for the Nutanix Enterprise Cloud OS, validated for Nutanix NX, HPE and Dell XC Family hardware platforms. Insight also supports both Nutanix software and Cisco UCS hardware for organizations deploying Nutanix on the Cisco platform.

The support team for Insight OneCall™, also known as Datalink OneCall, provides problem resolution as well as day-to-day monitoring and management of these solutions, freeing customers' internal IT staff for strategic business initiatives.

The addition of Nutanix to Insight's extensive roster of supported data center solutions reflects growing adoption of newer technologies that consolidate management of private, public and distributed cloud-operating environments. The team's expertise in managing both on-premises and public cloud platforms, including proficiency with the Nutanix solution, enables enterprises to take full advantage of their Nutanix deployments quickly, cost-effectively and without in-house training investment.

"Most internal teams lack the bandwidth to handle day-to-day operations in complex hybrid IT environments while they're also working on the business innovation projects mandated by the C-suite. There aren't enough hours in the day to do both," said Shawn O'Grady, senior vice president and general manager, [Cloud & Data Center Transformation](#), Insight.

"More and more clients are offloading routine management and support to our specialists in order to relieve the pressure and ensure that business priorities are met," said O'Grady.

Rodney Foreman, vice president of global channel sales, Nutanix, said: "Every enterprise today is grappling with the challenges of managing the IT infrastructure across hybrid environments. Insight's deep experience in all things cloud as well as the on-premises environments gives our Nutanix clients the option to outsource management and incident resolution of our platform with confidence that they are in good hands."

Insight Cloud & Data Center Transformation services are provided by a team of more than 700 architects, engineers and consultants with deep expertise across server, storage and network technologies. Insight OneCall™ support and managed services specialists streamline incident resolution as well as optimize management and performance across on- and off-premises environments.
